## ABOUT US

At GEOMAK SECURITY LTD, we specialize in providing cutting-edge security services designed to protect what matters most. With a focus on advanced technology and personalized service, we are committed to safeguarding homes, businesses, and communities through comprehensive security solutions.

Founded with the mission to offer reliable and efficient security systems, GeoMark has quickly become a trusted name in the industry. We leverage the latest in GPS tracking, surveillance technology, and data-driven solutions to provide real-time protection and peace of mind to our clients

---

## MISSION STATEMENT

### Mission

Geomak security ltd is committed to providing exceptional services by delivering personalized, high quality and cost efficient solutions to meet the need of our clients.

we strive to exceed the requests of our clients by going above what is asked to ensure that every detail is to your requirements

### Vision

We are committed to the ongoing improvement of the services we provide to our clients. By investing in and developing our most important assets, our staff, we aim to achieve all our goals and exceed our clients' expectations. Through our commitment to high standards it is our vision to earn the trust of our clients by delivering the best quality security services within Kenya

### Values

As a company as individuals we value above all else honesty, integrity, unselfishness, professionalism and mutual respect. For our staff, we offer a rewarding and challenging environment where personal development can flourish. We hold clients, accountable to our and partners by honoring our commitments, providing and continually striving to provide the highest qualityffurity services.

# RECRUITMENT & TRAINING

we selection and training of our guards is carefully done to ensure that Those finally recruited have relevant experience that meet specific need each customer and that the results is delivered.  
n recruitment the guards are required to;

Produce a certificate of good conduct. The certificate is subjected to further scrutiny to determine its authenticity

Literacy(Read and write) in English and kiswahili and Form 4 grade D

Experience and qualification in other relevant areas of work eg training in public relations, customer care and preference given to previously held leadership positions

References from previous employment,clergy of their religious affiliations,chiefs and next of kin

In each case the telephone numbers have to be disclosed to enable verification by the employer

# Training

Our training covers the following areas;

→ Foot drill, security operating procedures, qualities of security personnel, arrest of suspects, security searches, handling/taking over procedures,

→ skills, information gathering, code of ethics, first aid, HIV/AIDS awareness, customer care and fire response procedures.

→ Each training session is conducted by experienced resource person.

→ A training session is programmed to last a minimum of fourteen days and a maximum of fourteen days

→ Specialized training is organized to deal special customer needs such as terrorism and emergency evacuations. Refresher training courses for supervisors are conducted regularly.

→ Supervisors attached to the guards make round the clock spot checks as well as monitoring through radio call and personal visits to ensure discipline is maintained throughout their assignments.

# TRAINING PROGRAMME SUMMARY

Strict recruitment selection guideline applies (minimum 'o' level) and physical criteria. The company is apparently equipped with facilities and materials to turn the recruits in disciplined, robust and helpful member of the society

The programme runs for six weeks.

Below is a summary of the training programme:

## 1. Physical training

Twenty lessons are covered to prepare a physical fit guard.

## 2. Drills

These are standard military foot, hands and baton drills that facilitate uniformity of purpose, action and impress on smartness.

## 3. Chain of command

These are lessons taught to impart knowledge of hierarchy in organization and therefore due respect.

## SECURITY SPECIALTIES

Our highly experienced technology consultants develop security, fire alarm, audiovisual systems and communications infrastructure solutions that address the client's security, safety, and technological needs, hence we are a trusted supplier of leading technological security solutions to clients across Kenya.

In the course of delivering exceptionally responsive service to our clients, we effectively interact with our clients' internal staff, external consultants, architects, and systems integrators. Below are our security specialties.

### GUARDING SERVICES

monitoring systems

2

### EVENTS SECURITY

Risk, Threat and Vulnerability  
Assessments, security  
strategies.

5

### ALARM & BACKUP

Superior & Automatic alarm  
systems with 24 hours  
coverage

3

6

### EXTRA SERVICE

Some text

## K-9 Unit

We have well trained and robust security dogs of quality breeds. We have German Shepherds and Rottweiler breeds. Our dogs are supervised by professionally trained handlers. The kennels are well maintained and regularly inspected by the vet. Vaccination records are well regulated.

## Radio Alarm Response

We have a fleet of reliable back-up vehicles which are strategically placed for radio dispatch to attend to any emergencies within minutes. These vehicles are dedicated to security assignments and are constantly monitored through control room for positioning. They are manned by very highly trained crew members. We also provide Roadside Rescue Services for our clients. All the vehicles are monitored through a well-equipped 24/7 Control Room with the latest

## Intruder Alarm System

### Wired and Wireless Alarm system

In a world of Increasing Insecurity at homes and offices, it's now important to install Intruder Alarm System.

The Intruder Alarm System units are available from 8 to 128 Zones.

State of the art equipment can be installed to meet every need and budget, from basic window and door sensors all the way to motion detectors.

## CCTV (IP Based / Analogue Based)

We install and maintain Affordable and High quality CCTV systems whether for your home or business. We offer both analogue and Internet protocol Cameras based on the clients preference. However we will not hesitate to advice you on the best and latest technology.

Our technical engineers recognize the importance of outlook of installation and therefore ensure absolute coverage for your security. We use recognized brands that are effective and user friendly.

## Access Control

We acknowledge every organization's need to manage access to their premise, information, equipment as well as the security of their employees and visitors. It is essential to manage and monitor who has access to what office, records, entry and exit.

With these systems, you are able to restrict entrance to places and hence able to determine who is where and when. This minimizes dangerous incidents, frauds or theft from occurring.

If you are looking for any system from biometric time and attendance systems, computerized time recording solutions for flexi time workers or simply a traditional time recording machine, then we have the answers for you!!

## Walk Through and Metal Detectors

The detectors are able to detect everything from medium sized pistols, knives, drugs etc. They are user friendly and have ease in maintenance therefore guaranteeing you maximum safety, protection and convenience.

The PD6500i leads the industry with advanced pinpoint technology and matchless discrimination features. It is designed for maximum throughput without compromising security, the PD6500i is the walk-through of choice for security professionals worldwide.

## Perimeter Security (Electric / Razor Fencing)

Protecting of the perimeter fence is the first line of defense in asset and lives security. We undertake installation of electric and razor fences while maintaining high quality standard materials.

Security barriers can be automatic or manual and equipped with booms which are resistant to forceful access.

## Under Vehicle Surveillance System - UVSS

Uvss offers the ability to capture a color image of the undercarriage of a motor vehicle within three seconds of the vehicle driving up to the entrance of the premises.

The digital colour Uvss and digital video Uvss are surveillance systems specially designed to inspect the undercarriage of motor vehicles to expose any suspicious attachment like weapons, explosives and contraband.

## Security Consultancy

Even if you have had security measures in place for many years and believe you've covered all the bases, it pays to have an independent security audit. From commercial buildings to shopping malls, offices and factories to hotels and private homes, we compile comprehensive, clear reports that will leave you free to decide on your next steps. We will:

- Identify weaknesses in your physical and procedural security systems
- Review access controls and CCTV measures
- Examine accident prevention measures
- Trace flaws in your Information Technology network
- Look at the safety of staff, visitors and clients
- Assess and act to protect assets both tangible and intangible.

## Parking System

We install and maintain the following parking systems:-  
**Semi-Manless Parking System:** That is the system that has been used as a ticket dispenser (without human resource) at the entrance but still used human resource on a booth on exit access.

**Manless Parking System:** That is the system that is already using the machine entirely, both on entry and exit access. HR is usually employed only as a custodian of the system or the cashier at Central Payment in the building area.

## X-RAY Baggage Scanning Machines

We supply, install and maintain any X-Ray Baggage system according to your liking, your financial budget and technical requirements; and you can be sure that A Team is more than capable of handling every question you may have in your purchasing process. From planning to buying, installation, and technical services.

## Home Automation

Home automation is building automation for a home, called a smart home. It involves the control and automation of lighting, heating, ventilation, air conditioning, and security, as well as home appliances such as washers, ovens or refrigerators. Wi-Fi is often used for remote monitoring and control. We do total installation, configuration and maintenance of smart home.

## Design Innovation

We improve existing products and services increasing their performance, boosting usability and functionality, reframing how they are perceived and experienced, adding new features and perfecting their design. We help solve technical challenges and performance issues through the application of our design methodologies, experimenting cutting-edge technologies, developing unprecedented ad-hoc solutions and providing overall tangible innovation

## Networking

Your network cabling infrastructure is vital to the success of your company.

Network Consultants, Technicians and Cabling experts are here to assist with the planning, design, installation and maintenance of your company's network and cabling installations. Our experience enables us to give you complete network and cabling solutions that fit your current needs, while accommodating any future growth requirements.

## Fire Safety

We offer a wide range of fire alarm and safety equipments for both current and prospective clients and we have well experienced and trained personnel to conduct fire assessments in both private residence and large commercial premises.

The assessments advice what the current risks are at hand and the measure to be taken to curb such risks.

## Command and Control Centre

### 24 Hours Control Room

We have a 24 hours manned control room monitoring all security contracts.

Our duty controllers are the first point of contact that our customers, staff, potential customers, suppliers and the general public have with our company. Our controllers are well trained and receive detailed and rigorous training in execution of their duties.

The team is dedicated to their role, they have proper customer Care Skills, Good Communication Skills and have a proactive approach to issues.

A logbook is maintained to record incidents that occur nomater how trivial. The incidents are then brought to the attention of the management for further action.

Post Office: **NAIROBI GENERAL POST OFFICE** (Postal Address)

**I. General Conditions**

1. The Licensee shall observe the current and future provisions of the International Telecommunication convention and the Radio Regulations as far as they are applicable to the class of station named in this licence. The Licensee shall also be subject to the Kenya Information and Communications Act, 1998, the Communications Regulations promulgated pursuant thereto, and to the orders and decisions of the Authority.
2. The transmitters shall be operated under an annual licence, which must be kept in force at all times by renewing on or before 30<sup>th</sup> June every year in accordance with the Communications Regulations and Section 36 of the Kenya Information and Communications Act, 1998.
3. The licensee shall ensure confidentiality, non-disclosure and non-reproduction of any message received which the licensee is not entitled to receive.
4. The station shall be operated only by persons duly authorised by the Licensee for the purposes laid down in this licence.
5. This licence is subject to withdrawal or modification at any time by specific notice in writing sent to the Licensee. Any breach of the conditions of this licence, the provisions of the Act, or the Communications Regulations will render this licence liable to suspension or revocation.
6. This frequency assignment shall not be loaded with any value-added service whatsoever without prior authorisation by the Authority.
7. If the Licensee is authorised to provide a communication service utilising the radio stations licensed pursuant hereto under a telecommunication or other licence issued by the Authority, all of the terms and conditions of the said Licence are hereby fully incorporated into and made part of this RADIO LICENCE as if they were fully stated herein.
8. The station shall be subject to approval of the Authority and, together with this licence, shall be open to inspection at all reasonable times by duly authorised officers of the Authority without prior notification.
9. On the occurrence of any public emergency or in the interest of public safety or tranquility, the Cabinet Secretary responsible for internal security within the state may, by order in writing, direct: -
  - a) any authorised employee of the Authority to take temporary possession of any radiocommunication station within the state and the apparatus which may be installed or used therein; and
  - b) that any communication or class of communication shall or shall not be emitted from such station or apparatus.

**II. Change of Ownership**

A licensee can reassign their licence rights on a Spectrum Licence to another Licensee following a commercial agreement approved by the Authority as per the Frequency Transfer Guidelines, 2022.

**III. Conditions for Revocation of the Frequency Licence**

This licence may be revoked due to;

1. Non-payment of licence fees,
2. Modification of the authorised parameters,
3. Operating using equipment that is not type approved/accepted by the Authority,
4. Operating on frequency (ies) not authorised by the Authority,
5. Hiring, leasing out of radios,
6. Transfer of the assigned frequencies/licence to another entity without authorisation by the Authority,
7. Failure to comply with directions given by the Authority aimed at eliminating or reducing incidences of harmful interference,
8. Obtaining frequency/licence using false or misleading information or particulars,
9. Failure to allow access into the premises of the station by the Authority's officers or authorised agents,
10. Any violation of the Kenya Information and Communications Act 1998, or the Kenya Communication Regulations (2010), or any other legislation.

**IV. Obligations of the Licensees**

The Licensee is obligated to notify the Authority in writing of all changes in relation to the following information, which have been submitted in the original licence application:

1. Station's address, telephone, email and other contact information,
2. Changes in ownership of a company i.e. Changes in Company's CR12,
3. Declaration of your network configuration by 1st June every year to facilitate billing for the next financial year,
4. Communicate in writing to the Authority if you wish to stop utilising the assigned frequency,
5. Comply with the requirements of civil aviation, local authorities and any other applicable authority with respect to all aspects of transmission masts / towers.
